VRANDESH BANDIKATTI

HANDS-ON TECHNICAL LEAD | FULL STACK & BACKEND ENGINEERING | CLOUD & APPLIED AI

Melbourne, VIC | 0468 450 792 | vrandesh@gmail.com | linkedin.com/in/vrandesh

Architecture • coding • team guidance • production ownership | Available from 15 October 2026

PROFESSIONAL PROFILE

Hands-on technical leader with 17+ years building production software across financial services, payments, data platforms and SaaS. Combines architecture and delivery leadership with coding in Python/Django, Node.js/TypeScript, React/Vue and secure APIs. Led small engineering teams and coordinated larger cross-functional groups; brings practical judgment in cloud design, identity, CI/CD, observability, incident response and AI-assisted workflows. Particularly suited to Tech Lead, Lead Software Engineer and hands-on Engineering Lead roles.

LEADERSHIP AND ENGINEERING STRENGTHS

Technical leadership Architecture decisions, API contracts, peer reviews, mentoring, delivery risks, product/stakeholder alignment, UAT

Hands-on software Python, Django, FastAPI, Node.js, TypeScript/JavaScript, GraphQL/REST, React, Vue, SQL/NoSQL

Cloud and quality Azure, AWS, GCP, Durable Functions, Lambda/Step Functions, Docker, CI/CD, observability, authentication, RBAC

Applied AI Governed RAG/data agents, document-processing workflows, structured outputs, human approval and deterministic validation

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer (Data Science) | Technical Lead responsibilities

Findex Australia, Melbourne | March 2022 – Present

- Coordinated engineering and data specialists in cross-functional teams of 4–19, combining architecture decisions, hands-on delivery and executive stakeholder engagement.
- Architected enterprise applications with Python, Django, GraphQL, React/Vue and Azure; took remuneration, education and analytical products through design, UAT and production.
- Delivered financial incentive calculation workflows for thresholds, caps, payaway curves, referrals and forecasting, replacing spreadsheet-heavy logic with maintainable and auditable services.
- Defined secure integration and delivery patterns: Entra ID SSO, RBAC, row-level security, CI/CD, monitoring and deployment/recovery processes.
- Supported a critical production incident as interim DevOps lead; worked on service stabilisation, CI/CD reliability and Grafana observability.

Senior Software Engineer, Product Innovation | Team Lead

Quest Payment Systems, Melbourne | October 2017 – March 2022

- Led three engineers and remained hands-on across the backend/cloud delivery of Donation Point Go and Airpay, from prototype to live operational support.
- Designed/maintained 12+ Node.js/AWS serverless microservices and integrations, with event-driven scaling, operational monitoring, reliability controls and financial-system integrations.

Technology Lead / Full Stack Developer

Apptarix Mobility, Bengaluru | June 2013 – July 2017

- Managed a five-person development team across analytics, EdTech and media product lines, owning solution architecture and delivery alongside coding and data design.
- Built ingestion, web and NLP-related functionality and contributed to provisional patent 201641021557 on recommendation effectiveness.

Earlier engineering experience

ESRI Australia; Studio360eye; UNI Media Group; Hewlett-Packard / Mphasis | 2009 – 2017

Engineering, consulting, founder-led product delivery, geospatial applications and production infrastructure.

REPRESENTATIVE PLATFORMS

Financial modelling / KRM Delivered a secure remuneration platform, with auditable financial rules, Entra/RBAC and access-controlled analytics; onboarding for 443 users and 129 people leaders.

Payment systems / Quest Architected production serverless backends and integrations for contactless donation and mobile-POS software.

AI and document automation Designed rule-grounded payroll automation, guarded data assistants and resilient Azure Durable Functions document workflows.

EDUCATION & PROFESSIONAL DEVELOPMENT

Harvard Business School Online — Certificate in Business Analytics (2023) | BE, Electronics & Communication, Visvesvaraya Technological University (2008). Further training in Azure Data Engineering, AI/ML and React/TypeScript.
